AUSTRALIAN INNOVATIVE WHEAT (AIW)

Australian Innovative Wheat (AIW) is a class for new and unique varieties of wheat, exhibiting distinctive end use properties which are not available in the main classes.

It is anticipated that AIW varieties will be traded as single varieties and in a closed loop, unlike mainstream varieties.

CORE CLASS CHARACTERISTICS*

GRAIN ATTRIBUTES

- Specific to variety for specified market function

MILLING PERFORMANCE

- Specific to variety in line with grain attributes

QUALITY GUIDELINES

- Unique characteristics according to variety

END PRODUCT USE

- Distinctive use validated by market opportunity

*Performance is indicative and typically reflective of optimum conditions.
